Iran's annual inflation rate measured for today is 293%. This is an all-time high.

Annual Inflation (9/2/18): 293%

Official Annual Inflation: 10.2%

Sources: Bonbast.com, Central Bank of the Islamic Republic of Iran, US Bureau of Labor Statistics
Calculations by Professor Steve H. Hanke, The Johns Hopkins University
Note: These inflation rates are implied from the black-market IRI/USD exchange rate using PPP; values under 25% should be considered unreliable

Despite requests, I have no plans to meet Iranian President Hassan Rouhani. Maybe someday in the future. I am sure he is an absolutely lovely man!

The connection between trends on [Twitter](#) and News articles in the U.S. ,The New York Times.

Are they always the same thing?

When they are related and when they are not?

Challenges:

Using D3.js for the first time

Twitter trends API and The New York Times API, had to make my own server using Express.js, Heroku and Twit library.

A screenshot of a browser window showing a list of news articles from The New York Times. The URL in the address bar is "localhost:8080/NYT/articles". The page displays a JSON array of article titles. The titles listed are:

```
[ "Air Force Academy Removes Commandant of Cadets Amid Inquiry", "California Governor Aims to Hike Security Grants", "NFL Notebook: Cardinals Plan to Start Murray", "Faulkner Rows Back After 'Boyfriend' Post Causes Confusion", "Multisubject Photos", "Cardinals Score 6 in 5th Inning to Beat Nationals 6-3", "Las principales noticias del martes", "Albies' HR Backs Soroka's Strong Start, Braves Beat Padres", "UN Aid Chief: No Progress So Rohingya Can Return to Myanmar", "Akihito Begins Abdication Rituals as Japan Marks End of Era" ]
```
